

## Solution **Moving bag**<sup>®</sup>

The functional and no-waste bag

*How can you open a bag without tool, and reclose it simply, while preserving the contents?*

### Solution

Moving bag<sup>®</sup> is a hermetic bag with a convenient opening and a reclosing system. You just have to take off the pull-up tab to free a large and comfortable opening zone which enables the pouring or the picking of the product. An adhesive zone around the opening keeps the bag closed.

### Applications

- Dry, fresh, humid, greasy products ...
- Flexible packagings (flowpack, doy pack, quadro seal ...)
- All kinds of laminated films (PEPP, OPP/PE, PET, CPP...)
- All industrial sectors

### Functionalities

- Opening without tool
- Reclosing with simply one fold of the bag
- Picking or pouring simple and comfortable
- Reduction of the bag at each consumption
- Preservation of the content in its original packaging

### Industrial assets

- Innovating solution
- Functional packaging, till the product is fully consumed
- Hermetic and barrier system
- Marketing of the bag preserved
- No modification of the packing lines
- No decrease of the production rhythm
- The most economic solution on the market
