

## Solution for dosing

*How can you dose as much as needed a liquid, fluid or powder product in a container with a dosette accessible on the packaging?*

### Solution

This system is applied on the container. A dosette is formed and can offer a precise dosing. It can take the shape of a spoon or a glass depending on the needed measures. Ecological, this solution is recyclable as it is only a label.

### Applications

- Agrifood industry or others
- Liquid, fluid and powder products
- Can be adapted on all packing shapes (bottles, boxes, bags ...)

### Functionalities

- Convenient and precise dosing
- Only 10 seconds needed to form the dosette
- Avoid using a disposable and polluting tool
- Multi functional system: information, functionality and marketing

### Industrial assets

- Innovative solution
- Attractive marketing
- Customization with respect of the marketing identity
- Automatic application as any label
- No transformation of the packing lines, no reduction of the production rhythm
- Waste weight reduction
