

Up'n MAXI Solution

Easy opening & reclosing packaging
Take or pour system

Solution

Up'n Maxi is a system that allows to : cleanly and easily open a packaging. Simply pull on the label. The slot, positioned on the film, runs on each side and is stopped by the top sealing. Closing is done by lowering the label : easy !

This clever system is part of the packaging. Nothing has to be thrown excepted to the bag itself, neither while opening, neither as the bag is empty itself.

Applications

- Agri-food industry or other
- Dry, fresh, fatty products
- Adapted to Flow pack, Doypack, Quattro seal

Functionalities

- Opening without tool
- Simple closure
- Practical pouring
- Preservation of the contents in original packaging

Industrial advantages

- Hermetic system and barrier before the first opening
- Functional packaging until there are no product anymore
- Preservation of the packaging process
- Customization possible according to your graphic charter
