

up'n Bec Verseur Solution

For quattro seal bag

Solution

Positioned in the bellows of the quattro seal bag, the spout allows : to open the packaging without tools (scissors, knife ... etc) and to pour the product cleanly and comfortably. You only have to press on the spout, with one finger, to reclose the bag until next use.

Applications

- Agri-food industry or others
- Dry, fatty, powdery products (examples: dried seeds, snacking, confectionery, cereals)
- Exclusively on quattro seal bag

Functionalities

- An easy opening without tool
- Easy and very comfortable pouring
- Preservation of the contents in their original packaging

Industrial advantages

- Hermetic system and barrier before the first opening
- Functional packaging until the end of the product
- Preservation of the packaging process
- Respect your marketing
- Playful packaging
