

Up'n Mono-Material Solutions

For mono material recyclable open and reclose packagings

Eco-responsible partner and aware of sustainable development, we present you our new range of opening and reclosing systems for your packagings!

Responsible solutions

An opening and reclosing solution and its packaging built in a unique material

The Up'n Bag and Up'n Maxi systems are evolving in order to consider the environment. They have been eco-designed in cooperation with packaging's professionals for bags and trays.

Now our opening and reclosing solutions, at the end of their life cycle, provide an environmentally sound treatment by promoting recycling.

Applications

- **Mono-material paper** : every dry products (or moist products if paper with PE)
Paper's benefit: recyclability. Drawback: the bag tears completely while opening.
Solution: Up'n Bag and Up'n Maxi to deal with an easy opening and reclosing without any tool and without damaging the bag.
- **Mono-material PE**: a recyclable material from which recycled goods are used in France.
- **Mono-material PP**: recyclable when PP is advised.
- **Mono-material PET**: recyclable when PET is advised.

Functionalities

- For an easy open without tool
- Simple or multiple opening and reclosing
- Practical pouring
- Preservation of the contents in their original packaging

Industrial advantages

- Functional packaging until there is no product anymore
- Preservation of the packaging process. No loss of yield
- Customization possible according to your graphic charter

Also available in
PE, PP, PET
