

up'n Maxi Paper Solution

Easy opening & reclosing packaging

Eco-practical system for paper packaging recyclability

Solution

Up'n Maxi Paper is a system that allows to cleanly and easily open a packaging, simply pulling on the label. The slot, positioned on the film, runs on each side and is stopped by the top sealing. Closing is done simply by lowering the label: so easy! This clever system is part of the packaging. Nothing has to be thrown excepted to the bag itself, neither while opening, neither as the bag is empty itself. As it is designed in paper, considering the material of the packaging itself, the whole becomes recyclable.

Applications

- Agri-food industry or other
- Dry products
- Adapted to Flow pack, Doypack, Quattro seal

Functionalities

- To be opened without any tool
- No tearing of the packaging
- Simple closure
- Practical pouring
- Preservation of the contents in their original packaging

Industrial advantages

- Recyclable eco-packaging
- Hermetic system and barrier before the first opening
- Functional packaging until there are no products anymore
- Preservation of the packaging process
- Customization possible according to your graphic charter
