

Reclosed Powder Paper Solution

Easy reclosing packaging for powder products

Solution

Reclosed Powder Paper is an efficient solution to reclose paper bag containing powder products such as flour, sugar... Once you have opened wide the pouch on the top to take the contents with a spoon, or just on a corner to pour it, fold the pouch and use the non-sticking clips to reclose the pouch on itself.

Applications

- Food industry or others
- Powder products (sugar, flour, coffee, washing powder, ...)
- Can be used on flat bottom flow pack pouches, doypack, double square bottom bag, quattro seal

Functionalities

- Closing system with a non-sticking clipping mechanism without any risk of contamination because of the powder
- No risk of leakage thanks to the fold of the bag on itself
- Preservation of the contents in their original packaging
- A progressive reduction of the bag

Industrial advantages

- Mono-material recyclable packaging
- Innovative and playful marketing
- Differentiated products for you
- Improved comfort for consumers
- Product integrity guaranteed
- Functional packaging until there is no product anymore
